How to Optimize SNAP Mobile on Samsung

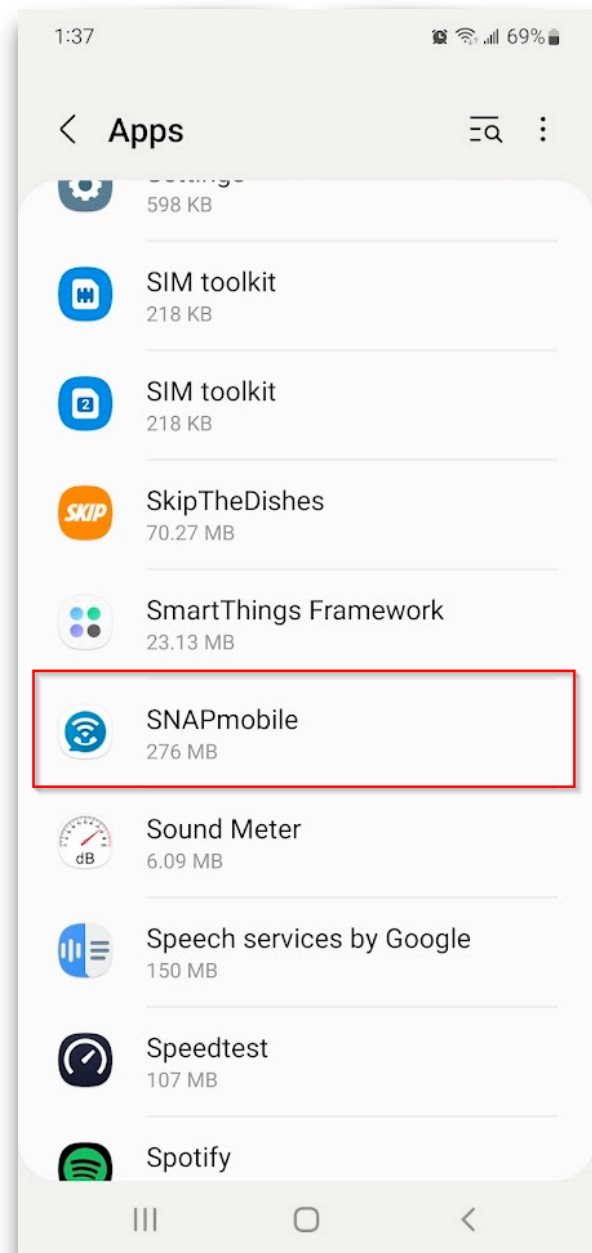

Note: You can try all setting or 1 at a time in order until your issues are resolved.

Exclude SNAPMobile from Battery Optimization:

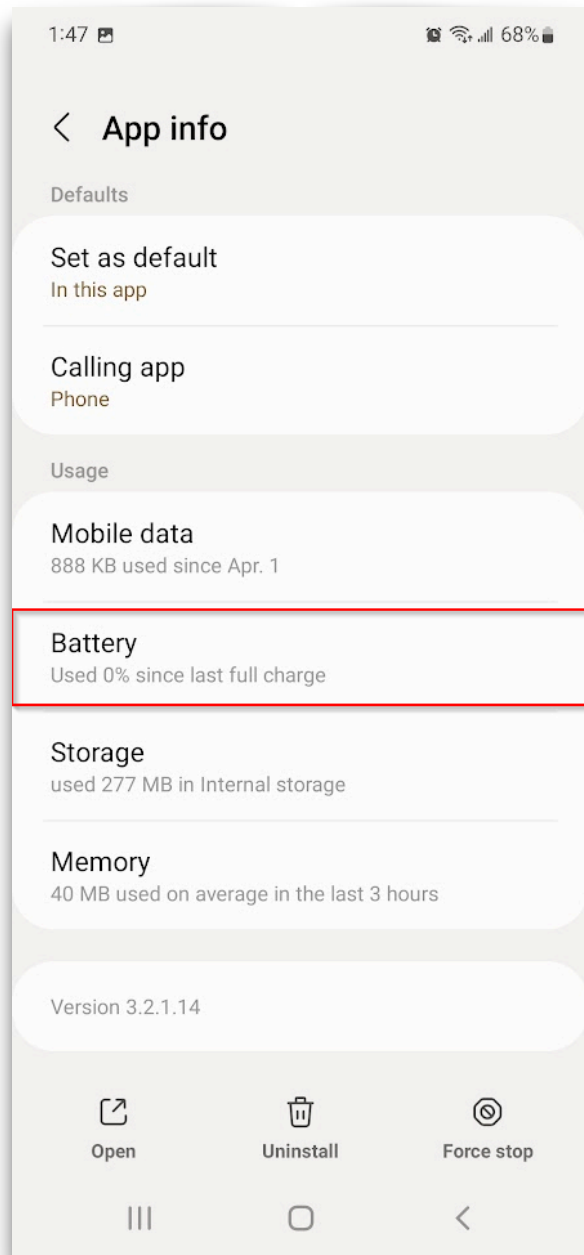

1. Navigate to Settings > Apps

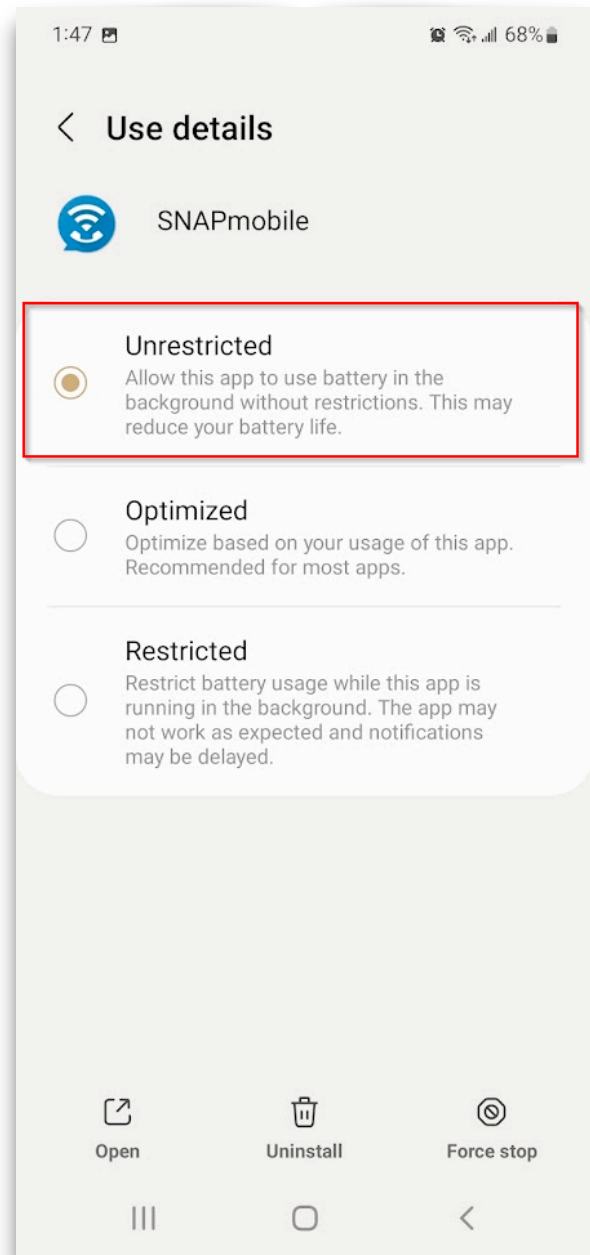

2. Select SNAPMobile from the list

3. Select Battery

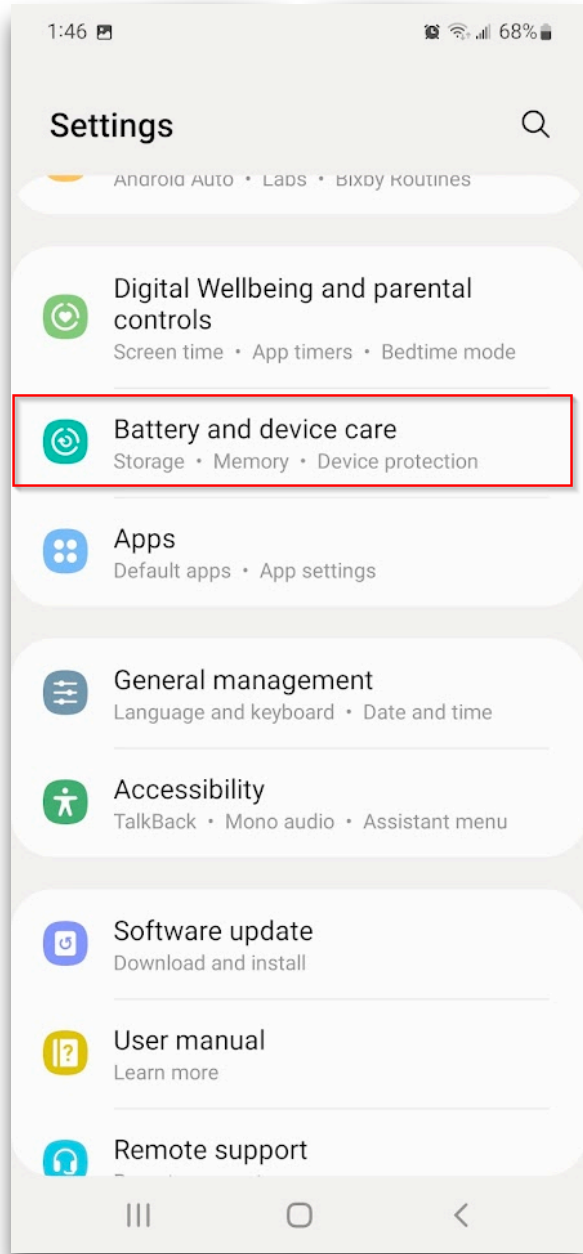

4. Select Unrestricted

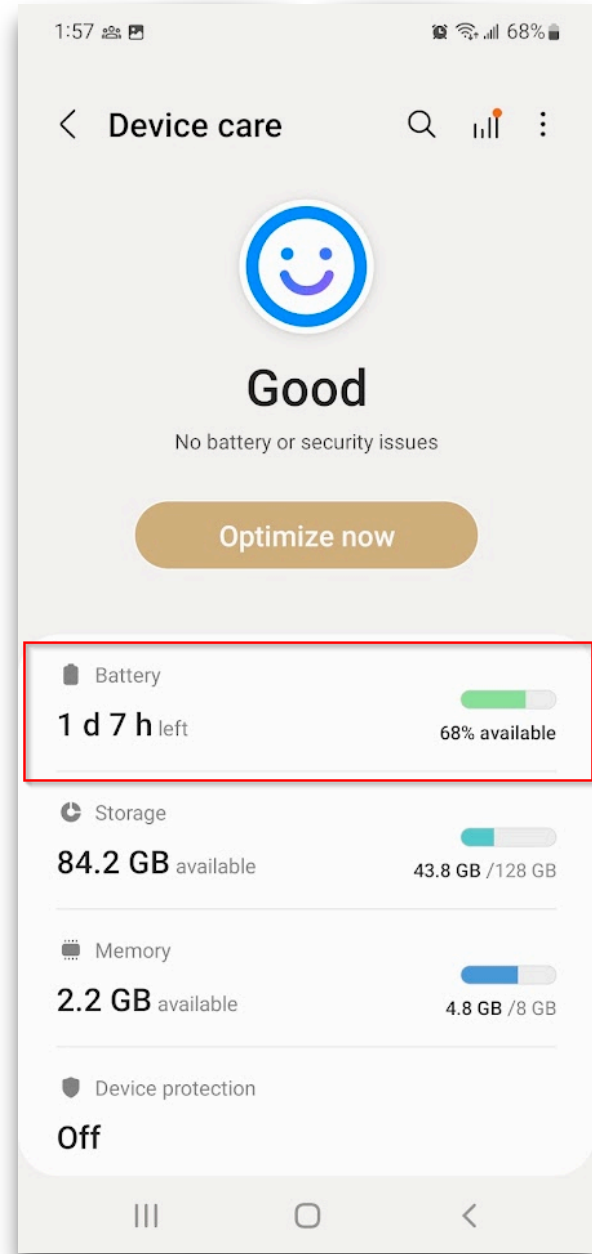

Disable Adaptive Battery:

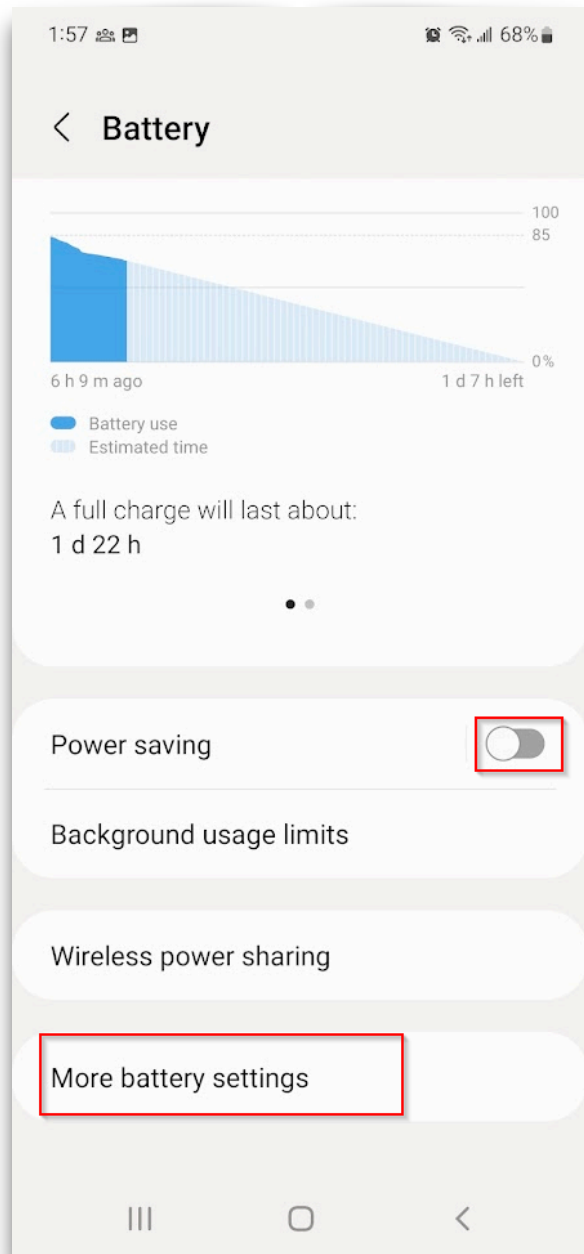

1. Navigate to Setting > Battery and Device Care

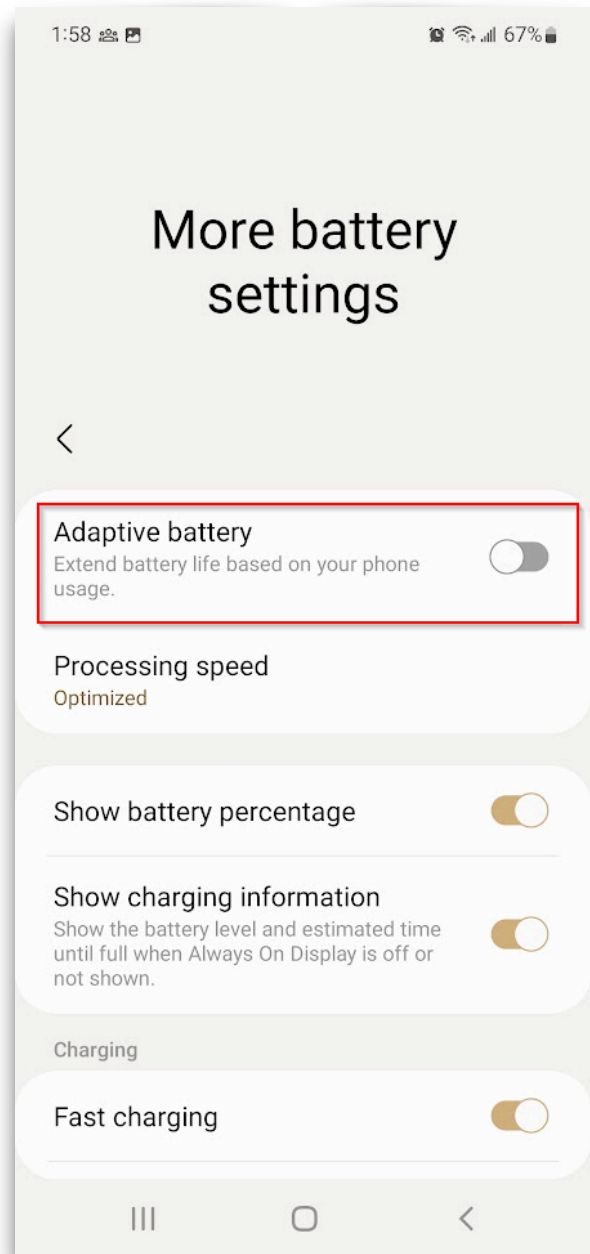

2. Select Battery

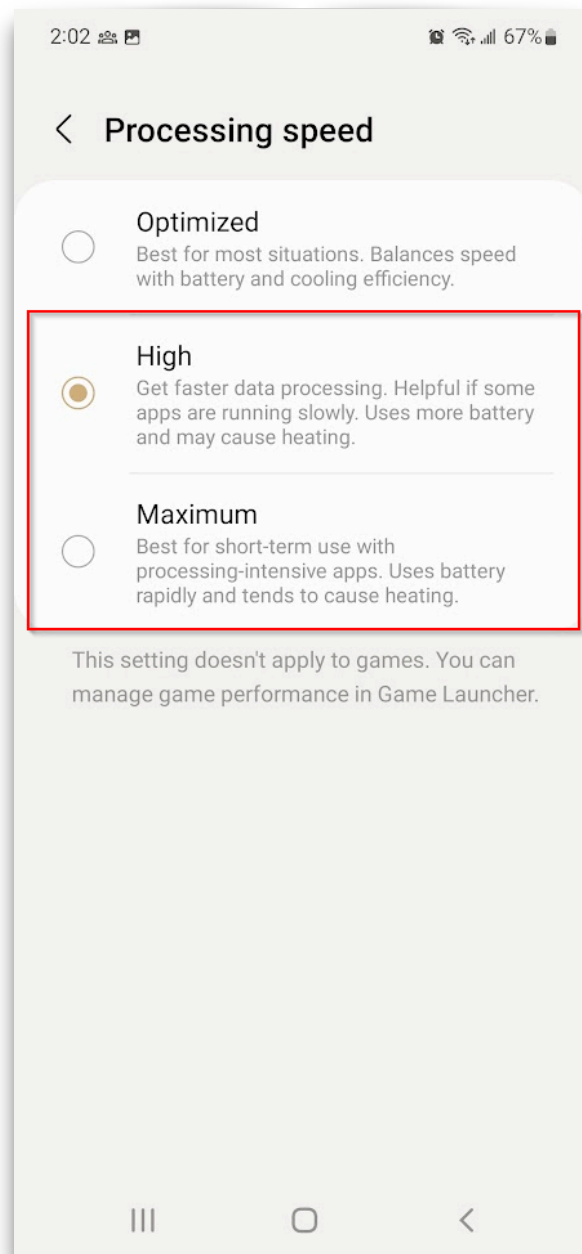

3. Ensure Power Saving is disabled, then select More Battery settings.

4. Disabled Adaptive Battery

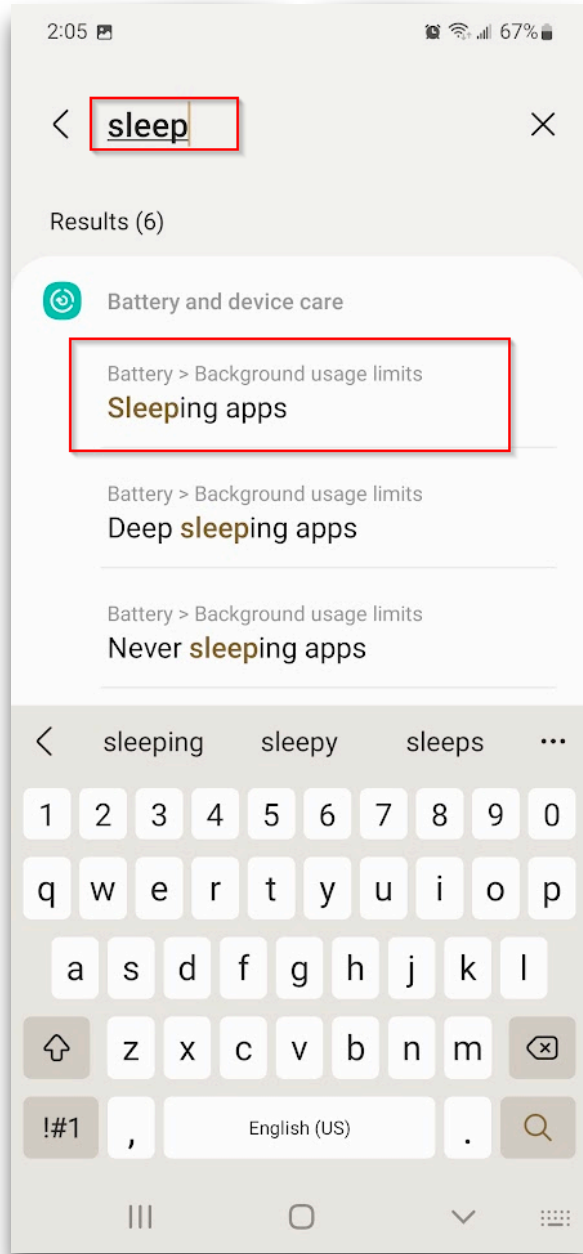

You may also need to change Processing speed to high or maximum if the app launches to slow.

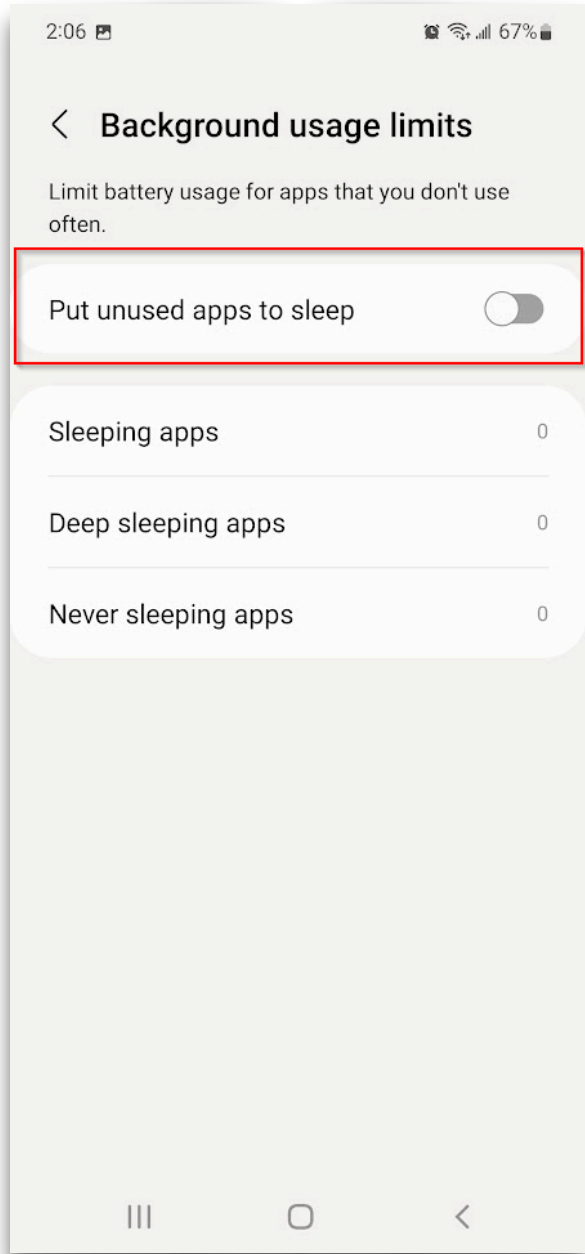

Disable App Sleeping:

1. Navigate to Settings and search for Sleeping Apps.

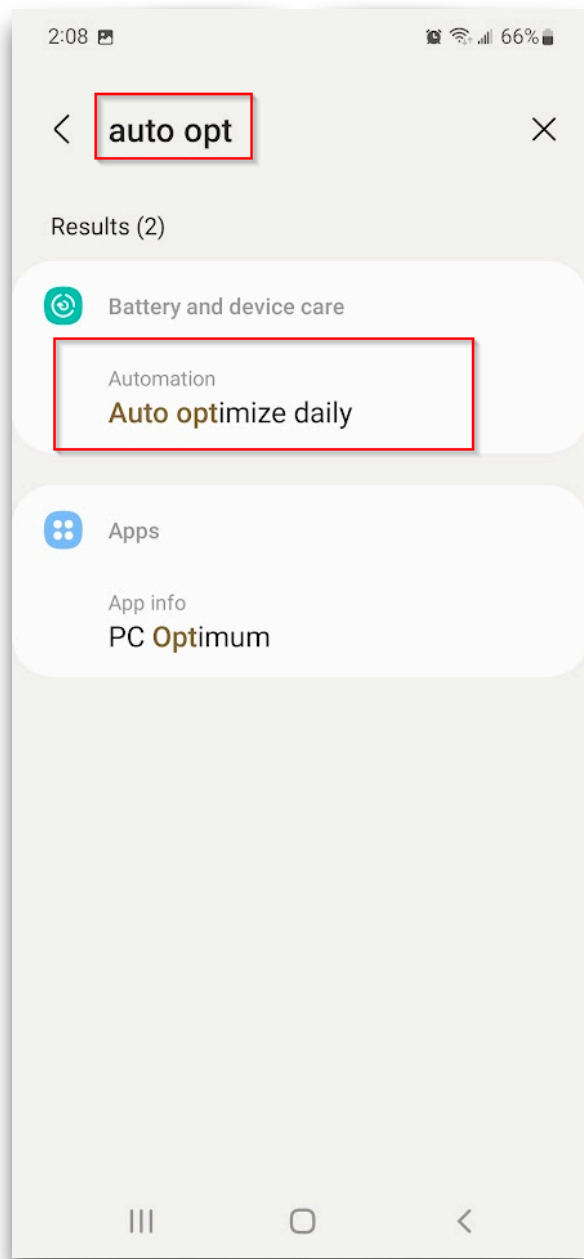

2. Disabled Put unused apps to sleep

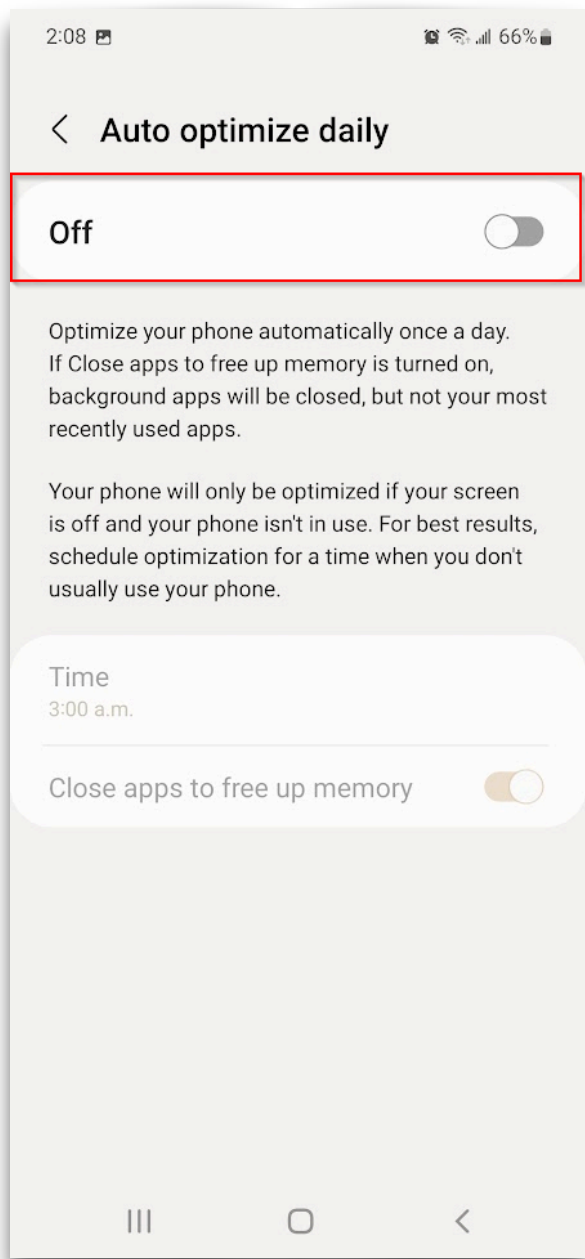

Disable Daily Optimization:

1. Navigate to Settings and search for Auto optimize daily

2. Disable

Note: Changing these setting can cause your battery to drain faster.
